

CONTENTS

ORIGINAL PAPERS

Astronomy.— Condensation of the table of the azimuth of celestial bodies. G.W. LITTLEHALES	461
Mathematics.— Equations containing only one unknown constant to represent the parabola, the rectangular hyperbola and certain exponential curves. H.E. MERWIN	467
Physics.— The testing of potentiometers. FRANK WENNER and ERNEST WEIBEL	469
Physics.— Adjustments of the Thomson bridge in the measurement of very low resistances. F. WENNER and E. WEIBEL	471
Mineralogy.— Melilite and other minerals from Gunnison County, Colorado ESPER S. LARSEN and J. FRED HUNTER	473
Mineralogy.— Cebollite, a new mineral. ESPER S. LARSEN and J. W.T. SCHALLER	479
MINERALOGY.— Wurtzite at Goldfield, Nevada. F.L. RANSOME	482
