

CONTENTS

ORIGINAL PAPERS

Electricity.— A determination of the international ampere in absolute measure E.B.Rosa, N.E. Dorsey and J.M. Miller	211
Resistance coils for alternating current work. H.L. Curtis and F.W. Grover	219
Physics.— Helium tubes as light standards. P.G. Nutting	221
Organic Chemistry.— Some new compounds of the choline type. G.A. Menge	223
Chemistry of Foods.— Research work of the division of foods of the Bureau of Chemistry. H.W. Wiley	224
Biochemistry.— The colorimetric and physiological estimation of the active principle of the suprarenal gland. Worth Hale and Atherton Seidell	225
Plant Physiology.— The wilting coefficient for different plants and its indirect determination. Lyman J. Briggs and H.L. Shantz	228
